EUROPEAN APPLE AND PEAR CROP FORECAST

AUGUST 2013

August 2013

FOREWORD

WAPA, the World Apple and Pear Association, is pleased to provide the 2013 European apple and pear crop estimate. This data will be released on the occasion of the 37th Prognosfruit Conference, which takes place in Prague, Czech Republic from 8-10 August 2013.

This report is compiled upon the initiative of the apple and pear Working Group of COPA COGECA. The data has been collected with the useful support of the respective representative national producer organisations of the various Member States of the European Union and beyond.

In regard to 2013, this report concludes that apple production in the EU for the 21 top producing countries contributing to this report will increase by 7% compared to the previous year, corresponding to a production of 10.798.000T. This production is 6% higher than the average for the last three years. In regard to varieties, Golden Delicious production will be up by 11% to 2.545.000T. Gala will increase by 7% to 1.189.000T. Idared will be up by 8% at 1.060.000T, while Red Delicious is up by 5% to reach 569.000T.

Regarding pears, European growers predict a significantly higher crop up 18% compared to 2012. Indeed, it is reported that the total crop in 2013 will reach 2.236.000T, compared to 2012 production which reached 1.888.000T. This figure relates to the production of the top 19 Member States of the EU-28 growing pears and contributing with their data to this report. The 2013 forecasted crop is however 2% lower than the average crop of the last three years. In 2013, the Conference variety will see its production increase by 14% to 794.000T, Abate F will increase by 20% to 308.000T, and William BC will also decrease by 10% to 279.000T.

This report also provides information regarding stock trends during the last season.

Besides information provided by the representative organisations, this report is further completed by additional data regarding historic production data for the other EU Member States as well as for a number of relevant countries outside the border of the European Union, including the forecasted data for EU neighbouring countries and the USA. The Southern Hemisphere crop forecasts as initially released by WAPA in Berlin (February 2013) are also updated and presented in a summary format.

Important comments on the report:

- All crop data presented in this report are in metric tonnes (MT).
- Data are rounded to the nearest '000T. Rounding could influence % of variation in particular in case of low production levels.
- Data are those collected by the representative producer organisations of the respective countries. Data usually reflect the commercial volume of production and therefore does not include own garden production. These data could therefore also be different from those as collected by FAO.
- Since its entry to the European Union on 1 July 2013, Croatia has now been added to the list of EU Member States, including its historical data.
- When there is no reporting organisation, data included in this report relates to the information collected from FAOSTAT/EUROSTAT databases. This information is added to extend the scope of the report and to give a more comprehensive overview of the situation.
- The list of varieties has been established on the basis of the recommendation of the apple and pear Working Group of COPA COGECA. If a variety is not specifically specified, it is then reported into the category “other”.
- Concerning the USA, the official apples data will be made available on 22-23 August 2013 at the 2013 US Apple Crop Outlook Conference. The data as included in this report are therefore provisional and might change. For apples, the breakdown by variety is not yet available and therefore was extrapolated from last year's breakdown.

This report includes data received by WAPA up to 1 August 2013.
