

EUROPEAN APPLE AND PEAR CROP FORECAST

AUGUST 2012

August 2012

FOREWORD

WAPA, the World Apple and Pear Association, is pleased to provide the 2012 European apple and pear crop estimate. This data will be released on the occasion of the 36th Prognosfruit Conference, which will take place in Toulouse, France from 2-4 August 2012.

This report is compiled upon the initiative of the apple and pear Working Group of COPA COGECA. The data has been collected with the useful support of the respective representative national producer organisations of the various Member States of the European Union and beyond.

In regard to 2012, this report concludes that apple production in the EU for the 21 top producing countries contributing to this report will decrease by 9% compared to the previous year, corresponding to a production of 9.739.000T. This production is 7% lower than the average for the last three years. In regard to varieties, Golden Delicious production will be down by 15% to 2.212.000T. Gala will decrease by 6% to 1.070.000T. Jonagold will be down significantly by 27% to 468.000T, while Red Delicious will decrease by 18% to 555.000T.

Regarding pears, European growers predict a significantly lower crop down 22% compared to 2011. Indeed, it is reported that the total crop in 2012 will reach 2.060.000T, compared to 2011 production which reached 2.629.000T. This figure relates to the production of the top 18 Member States of the EU-27 growing pears and contributing with their data to this report. The 2012 forecasted crop is 17% lower than the average crop of the last three years. In 2012, the Conference variety will see its production decrease by 21% to 743.000T, William BC will decrease by 19% to 255.000T, and Abate F will also decrease by 26% to 284.000T.

This report also provides information regarding stock trends during the last season.

Besides information provided by the representative organisations, this report is further completed by additional data regarding historic production data for the other EU Member States as well as for a number of relevant countries outside the border of the European Union, including the forecasted data for EU neighbouring countries and the USA. The Southern Hemisphere crop forecasts as initially released by WAPA in Berlin (February 2012) are also updated and presented in a summary format.

Important comments on the report:

- All crop data presented in this report are in metric tonnes (MT).
- Data are rounded to the nearest '000T. Rounding could influence % of variation in particular in case of low production levels.
- Data are those collected by the representative producer organisations of the respective countries. Data usually reflect the commercial volume of production and therefore does not include own garden production. These data could therefore also be different from those as collected by FAO.
- When there is no reporting organisation, data included in this report relates to the information collected from FAOSTAT. This information is added to extend the scope of the report and to give a more comprehensive overview of the situation.
- The list of varieties has been established on the basis of the recommendation of the apple and pear Working Group of COPA COGECA. If a variety is not specifically specified, it is then reported into the category “other”.
- Concerning the USA, the official apples data will be made available on 16-17 August 2012 at the 2012 US Apple Crop Outlook Conference. The data as included in this report are therefore provisional and might change. For apples, the breakdown by variety is not yet available and therefore was extrapolated from last year's breakdown.

TABLE OF CONTENTS

The report contains the following sections:
