Quality Assurance. **From farm to shop.**

Strong partner.
Together for safe food.

„In our sales area we always pay attention to our products retaining their high quality and comply with the hygiene and label requirements, as well as with the implementation of frequent temperature control.“

„As a QS certified logistics operator I make sure that the fruit and vegetables are transported at their individually ideal temperatures and in a proper hygienic condition.“

„To me quality assurance is a matter of course and is always expected from my customers. That is why I am a QS scheme participant.“

QS Qualität und Sicherheit GmbH

Organisers of Prognosfruit 2016

Facts for Decisions.

Sponsors

Enzafruit New Zealand

The selection of Enzafruit Continent, the continental sales and marketing office of Enzafruit Limited, headquartered in Sint-Truiden (Belgium), focuses on apples and pears. In addition to the marketing of standard varieties like Royal Gala or Braeburn, Enzafruit also markets some exclusive varieties such as Jazz™ and Envy. Thanks to innovative research for new varieties and marketing strategies, Enza has become a world leader in the production of fruit and fruit trade. www.enzafruit.be

Kanzi®

Kanzi® (Nicoter cov) has been cultivated and produced since 2003 and by now is spread worldwide. The global production area is concentrated for 70% in the Northern Hemisphere (Europe and the USA) and for 30% in the Southern Hemisphere. Globally, the exclusive license holder for the production and marketing is GKE NV, headquartered in Sint-Truiden, Belgium. Besides Kanzi®,

GKE NV also holds the exclusive license on Greenstar® (Nico Green cov) and the in 2015 introduced pear Migo® (Cepuna cov). www.kanziapple.com

The Greenery BV

The Greenery supplies international supermarket chains, wholesalers, catering and the processing industry throughout the year with a comprehensive range of fresh fruit, vegetables and mushrooms. We complement the products from the Dutch cultivation with products from over 60 countries. www.thegreenery.com

Vereinigte Hagelversicherung VVaG

The Vereinigte Hagelversicherung (United Hail Insurance) is the plant-specialist insurer for agriculture, vegetable, fruit and wine production. Around 60% of the insured businesses in Germany have opted for the Vereinigte Hagel. As such, they are the undisputed no. 1 in Germany. The insurance organisation has more than 190 years' experience in the

insurance of weather damage. The organisation consists of about 100.000 members with an area of about 5 million hectares, totalling an insurance sum of € 9.5 billion. In case of damage, the 1.000 experts regulate the damage on site throughout Europe – competent, fast and reliable. 66 district teams – in Germany and abroad – offer members the opportunity to help determine the path of the organisation.

EUROPEAN APPLE AND PEAR CROP FORECAST

AUGUST 2016

August 2016

FOREWORD

Dear Prognosfruit participant,

WAPA, the World Apple and Pear Association, is pleased to provide in this report the 2016 European apple and pear crop estimate. This data has been released during the Prognosfruit Conference, which takes place in Hamburg, Germany from 3-5 August 2016. This year the conference celebrates 40 years since the first conference in hosted 1976.

This report is compiled upon the initiative of the apple and pear working group of Copa-Cogeca. The data has been collected with the useful support of the respective representative national producer organisations of the various Member States of the European Union and beyond.

With regards to 2016, this report concludes that apple production in the EU for the 21 top producing countries contributing to this report will decrease by 3% compared to the previous year, corresponding to a production of 12.005 T. This production is however 1% higher than the average for the last three years. In regard to varieties, Golden Delicious production will be down by 7% to 2.364.000 T. Gala also decreased by 4% at 1.329.000 T. Idared will be down by 6% at 1.064.000 T, while Red Delicious is also down by 2% reaching 633.000 T. Other new varieties will however increase by 14% to 530.000 T.

Regarding pears, European growers predict a lower crop down 9% compared to the previous year and 9% down compared to the last three years. The total crop in 2016 will reach 2.170.000 T. This figure relates to the production of the top 19 Member States of the EU-28 growing pears and contributing with their data to this report. In 2016, the Conference variety will see its production decrease by 5% to 918.000 T, Abate F will also decrease by 13% to 290.000 T, and William BC will decrease by 11% to reach 252.000 T.

This report also provides information regarding the stock trends during the last season.

Besides information provided by the representative organisations, this report is further completed by additional data regarding historic production data for the other EU Member States as well as for a number of relevant countries outside the border of the European Union, including the forecasted data for EU neighbouring countries and the USA. The Southern Hemisphere crop forecasts as initially released by WAPA in Berlin (February 2016) are also updated and presented in a summary format.

Important comments on the report:

- All crop data presented in this report are in metric tonnes (MT).
- Data are rounded to the nearest '000T. Rounding could influence % of variation in particular in case of low production levels.
- Data are collected by the representative producer organisations of the respective countries. Data usually reflect the commercial volume of production and therefore does not include own garden production. When there is no reporting organisation, data included in this report relates to the information collected from FAOSTAT and/or EUROSTAT databases. This information is added to extend the scope of the report and to give a more comprehensive overview of the situation.
- The list of varieties has been established on the basis of the recommendation of the apple and pear working group of Copa-Cogeca. If a variety is not specifically mentioned in the list, it is then reported into the 'other' category.
- Concerning the USA, the official apple data will be made available during the US Apple Crop Outlook Conference on 25-26 August 2016 in Chicago. The data as included in this report are therefore provisional and could be subject to change. For apples, the breakdown by variety is not yet available and therefore was extrapolated from an average of the previous five years' breakdown.
- The report is compiled with the intention of being presented at the Annual Prognosfruit conference. The data are provided by each country's representative apple and pear organisation(s). Since it refers to commercial data, the data can be different from official national statistics. Moreover, the data presented in this report will be subject to change depending on evolving weather conditions, due to picking and packing and/or general crop and market developments.
- Data are elaborated by WAPA for the Prognosfruit conference. Data are collected and processed professionally to be presented to the industry as reported, with the greatest level of accuracy, with total neutrality, integrity and independence. WAPA cannot be held liable for any misuse of the data nor held responsible of any interpretations by individual operators or by the market as a whole of the impact of the crop estimates. There are indeed many different factors that could impact the evolution of the market throughout a season.
- This report is presented with an industry commitment to transparency.
